

Protective Security Operations are proud to introduce you to PSO London Shield, our innovative and interactive app. This initiative centres on providing a single source of up-to-date and relevant Counter Terrorism information, advice and guidance. During the development phase, the response from organisations across London has been extremely positive with many seeing the benefit of working closer with us and their communications teams on the adoption of PSO Shield.

In order to strengthen the protection of London and Londoners from terrorist attack, the aim of this initiative is to provide relevant, up to date Counter Terrorism advice and guidance. We are working closely with colleagues from the New York Police Department, who previously launched SHIELD.

Simply download PSO London Shield onto your smartphone; complete the registration, submit and we will provide you with log-in details.

We welcome any feedback or suggestions of additional features that would be beneficial to you and your business.

For further information, please email the project leads, Keith Burdon or Kyle Hardcastle
